II. Read the text and answer the question according to what you read.

- Technology is a good way to:
 - Information and entertainment**
 - Relationships
 - More computers or technological devices
- With the use of technology it is difficult to:
 - Learn about other cultures
 - Communicate face to face**
 - Know what is happening around the world
- One advantage (ventaja) of technology is:
 - People never leave their homes
 - People spend too much time on their phones
 - It is faster to do research**

18 Young people today are using more and more technology. We even meet people online or on the phone. Technology has many positive advantages, but I believe there are also some disadvantages.

In my opinion, technology is a good way to get both information and entertainment. It is much faster to do research for projects, and many games and videos are available. We can also learn about what is happening around the world and understand different cultures.

On the other hand, technology means that people are not developing relationships. I think that people spend too long on their phones and computers, and find it difficult to communicate with each other face to face. People can do so many things on their computers that soon they will never have to leave their homes.

I am sure that technology will continue to develop and will play an important role in the lives of young people around the world. However, we must be careful that it doesn't take over our lives completely.

4. Technologies will play an important role in:
 - a) Young people's lives
 - b) Old people's lives
 - c) All people's lives

5. What would be the title for this text?
